Easy management Control Panel

We offer cPanel Control Panel to manage your website and hosting from one user-friendly control panel. The majority of our hosting services incorporate the industry leading control panel. It's super easy to use and provides a simple graphical interface, organised by category so that you don't have to rely on coding experts.

We offer a fully functional cPanel demo which will enable you to see just how easy it is to use before you place your order.

Building website, the smart and easy way

When you host with Luxhosting.lu you can get access to some of the world's most popular website building tools – pre-loaded or simply added them with one-click. Use cPanel and get access to up to 400 scripts and web apps that, most of which you are already familiar with like, WordPress, Drupal, and Softaculous.

WordPress is an open source software and one of the most popular content management software in the world. You can use it to create a beautiful website or blog. Designing a website with WordPress is free and our servers at LuxHosting are fully configured with the standard requirements for WordPress Hosting. There are thousands of plugins and themes available to transform your site into almost anything you can imagine. Over 60 million people have chosen WordPress as their CMS.

Joomla is an award-winning content management system (CMS), which enables you to build Web sites and powerful online applications. Many aspects, including its ease-of-use and extensibility, have made Joomla one of the most popular Web site software available. Best of all, Joomla is an open source solution that is freely available to everyone.

Drupal is an opensource platform and content management system for building dynamic web sites offering a broad range of features for content sharing purposes. Equipped with a powerful blend of features and configurability, Drupal can support a diverse range of web projects ranging from personal weblogs to large community-driven sites. It is preferred by site developers and offers more customisability than WordPress.

Softaculous is software that allows users to auto install web apps with a single click. It is available to all cPanel users. Unlike other auto installers Softaculous is much faster, well designed and it installs all scripts in just ONE STEP. You can install over 1000 scripts in just seconds. Softaculous has over 1000 very popular scripts covering a variety of categories. Feel free to take a look at the list of all the scripts available to you.
